DETAILED ACTION

Response to Amendment

1. Claims 1-32 and 34-40 are presented for examinations.
2. The text of those section of Title 35, U.S. Code not included in this action can be found in a prior Office Action.
3. Claims 1-32 and 34-40 are rejected under 35 U.S.C. § 102 (b) as being anticipated by Wissenbach et al. (U.S. Patent No. 5,633,809).

With respect to claim 1, Wissenbach et al. disclose a multi-function flow monitoring apparatus with area velocity sensor capability including a control circuitry, circuitry for storing a manually settable fluid flow rate parameter (see e.g. Fig. 5) and time interval determination circuitry (see e.g. Figs. 29, 33A and col. 7, lines 48-58).

With respect to claims 2-9, Wissenbach et al. disclose the invention as claimed including a processor, the flow determining program, instructions, a visual display, an input device for entry of at least one parameter, a key pad, a storage of a fluid

(see e.g. Fig. 5).

With respect to claims 10-19, Wissenbach et al. disclose the invention as claimed including the schedule, instructions for producing a plurality of timed fluid delivery output signal,

instructions for entry and storage of a delivery schedule (see e.g. col. 9, lines 26-46), an input device coupled to the control circuitry (see e.g. col. 1, lines 21-32), a source of electrical energy, AC/DC power supply (see e.g. col. 4, lines 10-14), a replaceable battery (see e.g. col. 7, lines 16-17), an input port for receipt of a signal indicative of a depth of fluid in storage (see e.g. col. 10, lines 32-36), an audible output device and a input port for receipt of a signal indicative of a depth of fluid in storage and instructions for actuating the audible output device (see e.g. Figs. 20-30 and col. 16, lines 14-63).

With respect to claims 20-32 and 34-40, the limitations of these claims have been noted in the rejection above. They are therefore consider rejected as set forth above.

Applicant's arguments filed 03/03/2003 have been fully considered but they are not persuasive. Applicant's argument that the references fail to anticipate the claimed subject matter.

The examiner disagrees because Winssenbach et al. teach a system including a keyboard defining the interface to the user manually operable the system (see e.g. col. 7, lines 51-54), a microprocessor, program storage, data storage (see e.g. Fig.5), time interval setting (see e.g. Fig.33A). Although the claims are interpreted in light of the specification, limitations from

the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

The rejection of claims 1-32 and 34-40 remains the same as the last office action.

Conclusion

4. Claims 1-32 and 34-40 are rejected.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
